PROFESSIONAL SKILLS

Frontend: React, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind, AlpineJS

Backend: Node.js, TypeScript, PHP, Laravel

Cloud: AWS (Serverless – Lambda, API Gateway, EventBridge, DynamoDB, S3, SQS, SNS, IAM, CloudWatch, X-Ray)

DevOps: Terraform, GitHub actions, BitBucket pipelines, Docker

Methodologies: RESTful API design, Agile (Scrum/Kanban), OOP, TDD

Training & mentoring juniors

EDUCATION

**BACHELOR OF SCIENCE (HONS) /
COMPUTER GAMES TECHNOLOGY -
FIRST CLASS 1;1**

Manchester Metropolitan University

Modules of Note: Algorithms & Data Structures, Web Development

Dissertation: AI powered chess engine in Java

EXPERIENCE

CAREER BREAK

Present
-
Apr
2025

International Travel

- Completed a planned career break involving international travel across Asia and Oceania, using the opportunity for personal development, perspective, and growth. Returning highly motivated to accelerate my professional development, deepen my technical expertise, and contribute within a high-performing engineering environment.

SOFTWARE ENGINEER II

SuitsMe

Promoted from Junior Developer -> Software Engineer I -> Software Engineer II

- Took ownership of an internal CRM from inception to delivery, collaborating closely with stakeholders to define requirements and deliver a production-ready system. Built using React, TypeScript, and PHP/Laravel, significantly improving customer engagement and internal operational efficiency.

- Designed, developed, and maintained backend banking services and microservices in PHP/Laravel and Node.js/TypeScript, improving system reliability, scalability, and maintainability across core financial operations.

- Played a key role in the integration of a new banking provider, refactoring backend microservices and APIs to support new banking integrations while contributing to a complete rebuild of the customer onboarding platform.

- Contributed to the migration of a large-scale legacy PHP microservices platform to a modern event-driven Node.js/TypeScript microservices architecture on AWS, using Lambda, EventBridge, SQS, API Gateway, and S3 to build scalable serverless systems.

- Developed and deployed cloud-native backend services within AWS environments using Infrastructure as Code with Terraform, supporting scalable and repeatable deployments across multiple environments.

- Implemented comprehensive automated testing strategies across unit, integration, and end-to-end layers, improving release confidence and reducing production defects in enterprise-scale systems.

- Investigated and resolved complex production issues using AWS CloudWatch and AWS X-Ray to trace distributed services, diagnose failures, and deliver timely resolutions.

- Contributed to CI/CD deployment pipelines and engineering best practices, reducing manual deployment effort and improving release reliability.

- Mentored junior developers across frontend, backend, and DevOps, improving team capability and development standards.

RESTAURANT SUPERVISOR

Dec
2019
-
Jan
2016

The Botanist

Promoted from Server -> IST -> Head Server -> Restaurant Supervisor

- Supervised daily restaurant operations, ensuring efficient service, smooth workflow and consistently high customer experience standards.

- Managed staff scheduling, shift coordination and floor planning to optimise service during peak periods.

- Led, trained and mentored over 30 team members on service quality, menu knowledge, operational procedures, improving team performance and consistency.
